3. Project Title: 1to1 tutor

Development Techniques: PHP5 (Admin Panel), Word Press (Front End)

Database: MySQL

Functionality: This is an online tutoring website where 1 teacher can be assigned for 1 student. Teacher and student both have to login in whiteboard (Online flash based board where teacher can write content and draw figures) and the session will be started. Three types Web, telephonic and whiteboard of sessions can be done simultaneously from this system.

My Activities: Team Leader

Front URL: <http://www.1to1tutor.org/>

Back-End URL: <http://www.1to1tutor.org/new1to1/admin.php>

4. Project Title: Infinity Property Management

Development Techniques: Cake PHP (Admin Panel), Word Press (Front End)

Database: MySQL

Functionality: Infinity Property Management is a property management service for UK landlords through their property postcodes. From this website a Landlord can manage a large number of properties. A landlord has to pay to register for each property and he can add Tenant or Agent for his property. When a complaint launched by the tenant or agent or by his own it will go automatically to Maintenance Engineer matching the postcodes of his property. He has to complete his job without quote if possible. Otherwise he may quote to landlord requesting the money for the materials needed to buy from market or he may refer it to Specialist Engineer. Like the same way as the maintenance guy Specialist Engineer will do his referred job and update the job status.

My Activities: Programmer

Front URL: <http://infinitypm.co.uk/>

Back-End URL: <http://infinitypm.co.uk/ipm/>
